

Figure 1. The three possible sponsor organization logos that were included on the three different versions of the task.

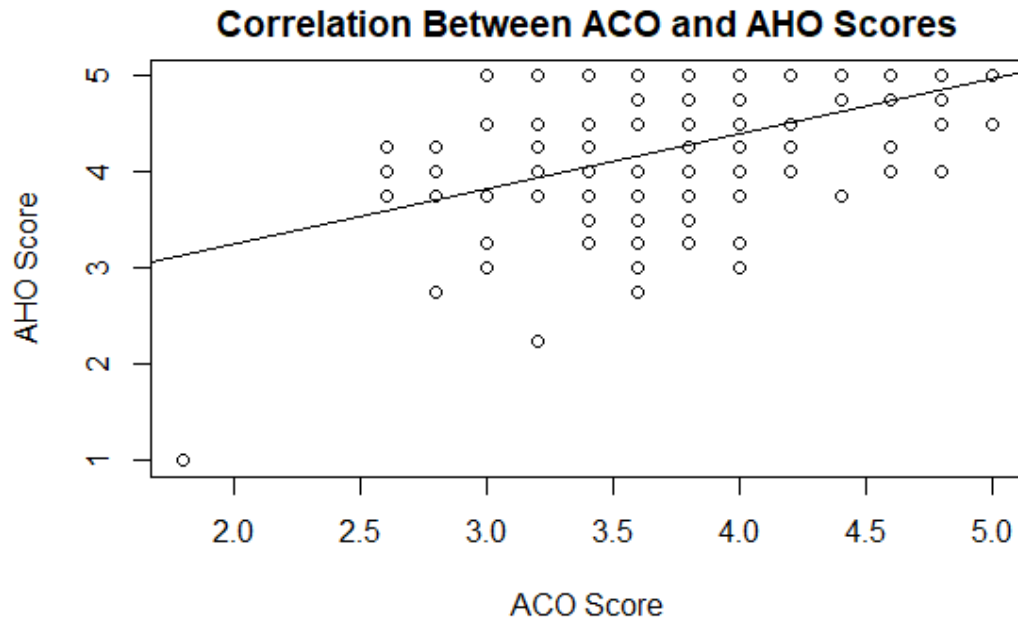

Figure 2. Correlation between ACO scores and AHO scores with a line of best fit.

A Sample Segment of the Azar (2019) FLP Task

On the following pages different letters are written. In the questions below you are asked to write which letter appears in a certain block, in a certain line, and in a certain position. The position of the letter in the line is counted from left to right. For example, the letter in block 1, line 1, position 3 is s.

Ex.: Block 1, Line 1, Position 3 s.

- | | |
|---------------------------------------|--|
| 1. Block 1, Line 6, Position 35 ____ | 8. Block 1, Line 31, Position 41 ____ |
| 2. Block 1, Line 9, Position 34 ____ | 9. Block 2, Line 3, Position 42 ____ |
| 3. Block 1, Line 15, Position 35 ____ | 10. Block 2, Line 8, Position 35 ____ |
| 4. Block 1, Line 18, Position 37 ____ | 11. Block 2, Line 16, Position 43 ____ |
| 5. Block 1, Line 23, Position 38 ____ | 12. Block 2, Line 18, Position 47 ____ |
| 6. Block 1, Line 28, Position 39 ____ | 13. Block 2, Line 19, Position 32 ____ |
| 7. Block 1, Line 30, Position 40 ____ | 14. Block 2, Line 21, Position 45 ____ |

Figure 3. A segment of the FLP task (Azar, 2019) illustrating the format of the questions and the blocks of text.

Letters Provided by Partisan Relationship to Sponsor

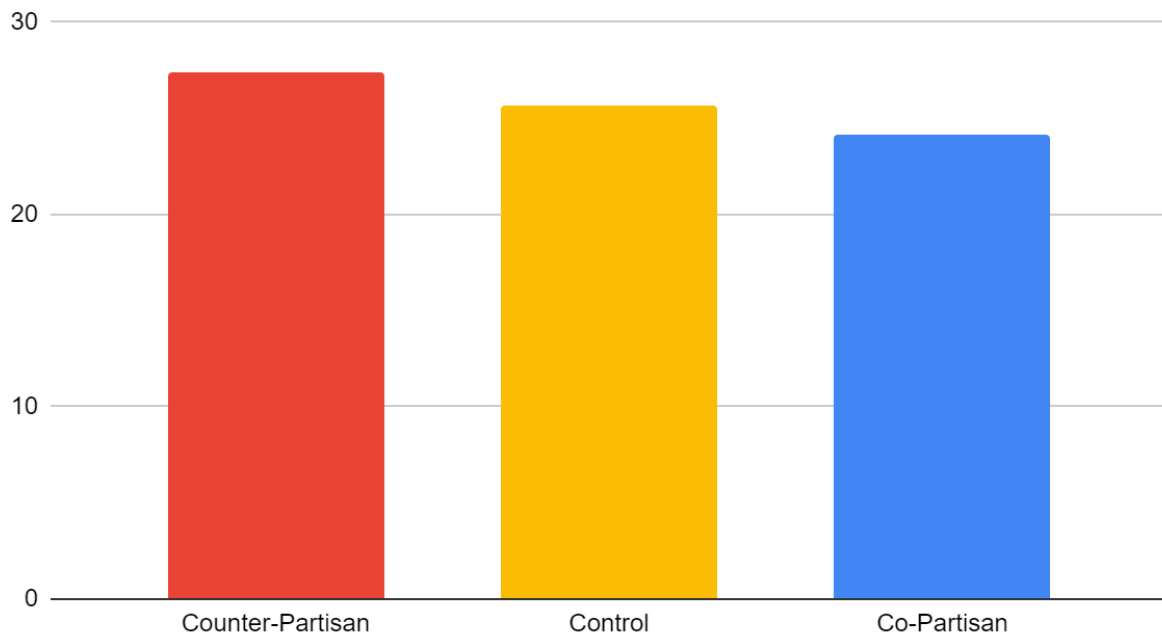

Figure 4. Correct letters provided on the task by partisan relationship to the sponsor organization (counter-partisan, control or co-partisan). There was no significant difference in correct letters provided based on partisan affiliation to the sponsor.

Letters Provided by Median Split ACO/AHO Scores

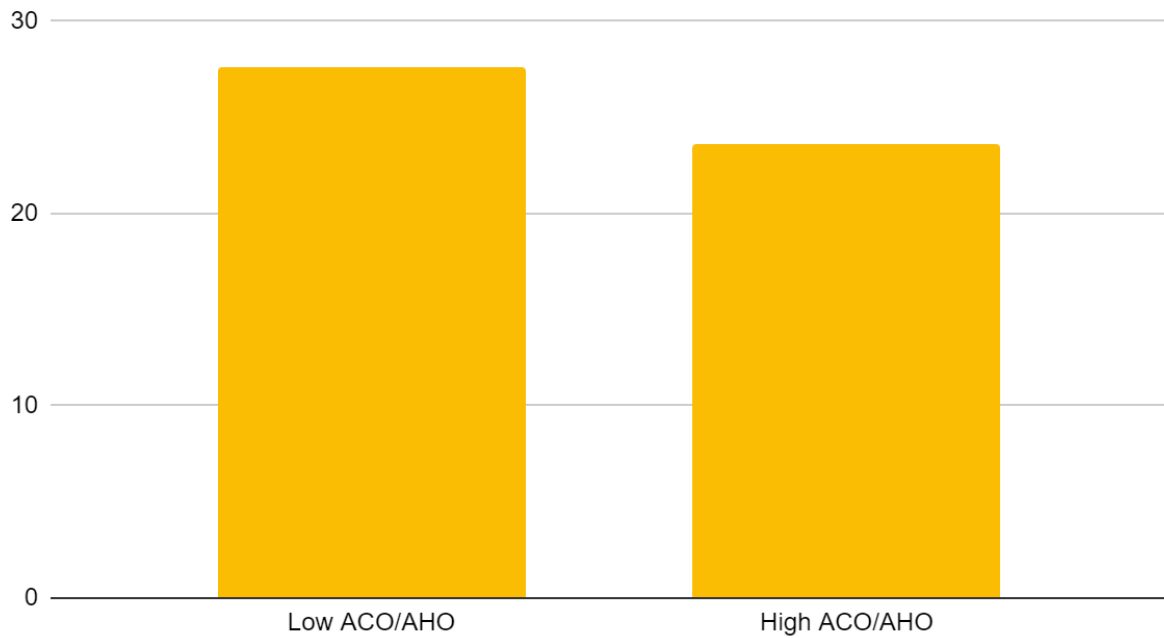

Figure 5. Correct letters provided on the charitable task by median split ACO/AHO scores. People with ACO/AHO scores below the median provided significantly more correct letters than people with ACO/AHO scores above the median.

Letters Provided by Partisan Relationship to Sponsor and Median Split ACO/AHO Scores

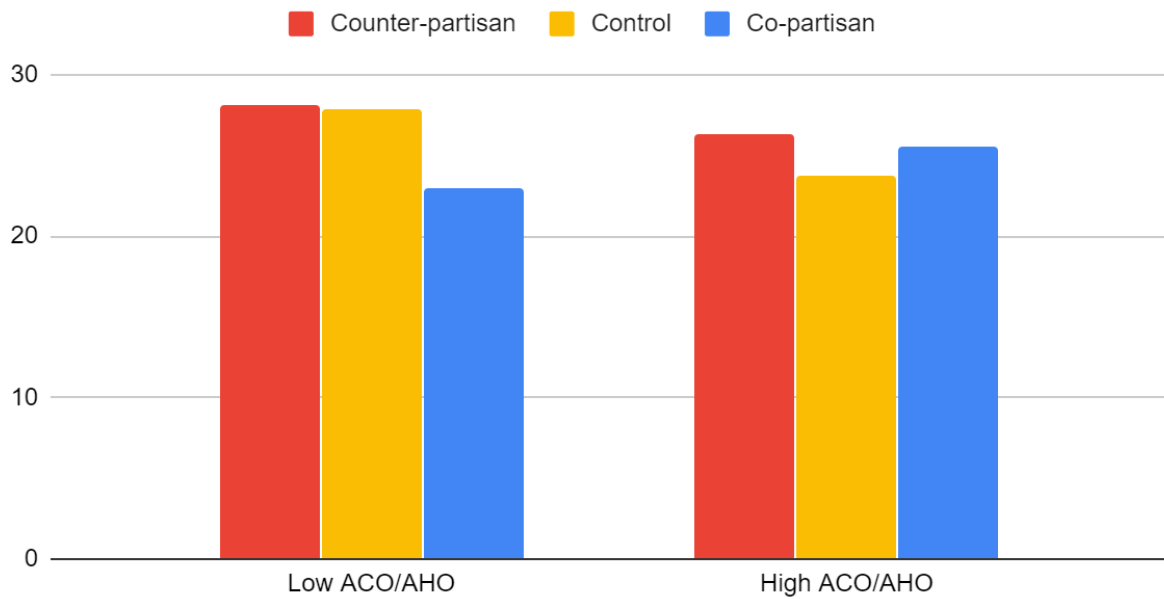

Figure 6. Letters provided by participants by partisan relationship to sponsor (co-partisan, counter-partisan or control) and median-split ACO/AHO scores. People who scored below the median ACO/AHO score provided significantly more letters for counter-partisan sponsors than co-partisan ones while people who scored above the median ACO/AHO score did not provide significantly different amounts of letters for counter-partisan sponsors relative to co-partisan ones.
